

Great News

EarlyEd can now offer Hanen® Speech Pathology Programs online!

It Takes Two To Talk®

More Than Words®

TalkAbility®

Only a few places are left. BOOK NOW!

Hanen® has released their newly researched online programs. The Hanen® Centre has just completed a very large telepractice research project in partnership with the government of Ontario to develop these 3 evidence based programs.

EarlyEd has been delivering Hanen® intensive, individualised speech language programs for many years and has already set dates for these online programs.

Any family wanting intensive Speech Pathology, who has a child that suits one of these programs, can join the group starting in April. The programs start now and end in late June. All you need is a computer or tablet!

It Takes Two To Talk® is for parents of young children (18 months to 5 years old) with delayed language.

More Than Words® is for parents of children up to the age of 5 years with a diagnosis of either autism or a social communication disorder.

TalkAbility® is for parents of Young Children (aged 3-8) with Autism Spectrum Disorder or a Social-Communication Difficulty.

For more information about the Hanen® approach go to:
